

Understanding Your Water Bill

Your bill shows the amount of water that went through each of your meters between the two dates listed. If your meter was replaced since your last bill, you are billed on the old meter (.1 added to meter number) up to the date of replacement and on the new meter from then onwards. 1 m³ (1000 litres or 220 gallons) costs 80c.

If your bill seems too high, first look at your meter to verify the reading, then start looking for a leak. Any leaks after the meter box are your responsibility and you must pay for the lost water. You can see your usage and billing history in CleverWater.

You can win cash by paying on time!

Please don't put this bill aside to be forgotten. Pay promptly and pay the exact amount.

Those who pay in full by 31st October 2026 will be entered in a draw for prizes of €100. The winners in 2025 were Michael O'Neill, Nancy Lyons, Thomas O'Neill, Tom McDonagh, John Francis Gilmore, Enda Farrell, Michael Burke, Declan Higgins, Paddy Tighe and Seamus Kilgarraff.

Help us to help you

- ≈ Notify us of any changes in ownership or contact details.
- ≈ Leaks are often invisible and the only indicator is a spinning meter. Periodically read your meter to monitor your usage and check for signs of leaks. You can find full instructions for how to do this on our website, www.gallaghgws.ie
- ≈ Turn off meters that are not in use for a while and check for leaks when turning them on again.
- ≈ Unused meters are leaks waiting to happen. If you are not using a connection (e.g. in forestry or a derelict house), please request removal of the meter. We can put it back in at no cost to you if you need it in the future.
- ≈ Do not cover or obscure your meter or impede access to the meter. We reserve the right to cut back shrubs or hedges that are covering marker posts or meter boxes.
- ≈ If you are planning to tarmac or concrete around a water meter, please contact us so that any work we might need to do there can be done beforehand.
- ≈ Report any leaks in meter boxes or on the roads to us.
- ≈ Join the committee!
- ≈ Water is a valuable resource and is not "free" even if your bill is zero. Don't waste it!
- ≈ Selling part of an estate or a subplot of land? Consider where the water goes and know that under no circumstances can a connection be shared by two owners. You may have to physically disconnect a plot from the supply and ensure the purchaser understands that a water connection is not included.

The earth's water supply is under threat. We need to protect our source from pollution and conserve water where we can.

You don't miss the water till the well runs dry.

Refer to the website for answers to any questions you may have about your water scheme.
